In this exam, the candidate is required to create your own eWallet Application in 3-5 days. You can:

- Use any programming language
- Use any database
- Use any UI / Front-End Framework
- Use any design and development patterns or any best practices with scalability in mind
- You can use dummy images and dummy OTP during onboarding
- Design is only a plus. No need to create the UI the same with the sample screens below.

The program shall have the following features:

- As a user, I want to be able to signup on the application. **(Onboarding)**
- As a user, I want to be able to login using the registered details nominated during onboarding. **(Authentication)**
- As a user, I want to be able to see the dashboard of my eWallet after successfully logging in. **(Dashboard)**
